

## # Meeting Agenda

**Group:** Hubba

**Date:** 2018-10-18

**Chair:** Johannes

**Participants:** Jian, Camilla, Li, Nils-Martin, Alexander, Johannes

### ## Objectives (5 min)

- Might have put android/view in model uncertain.
- Saving working?
- SDD and RAD
- Get userName via friend interface.
- Go through UserStories and check what needs to be done.

### ## Reports (15 min) from previous meeting

- **Li:** Created an interface for user called friend and started on System architecture in SDD.
- **Nils-Martin:** Created a VM for Group and implemented functionality for that class, still needs a View. Changed some variable names and minor fixes.
- **Jian:** Worked on RAD, Opening Habits from the list now works, Habits can be checked off when finished, and unchecked as well. Lists expand when there are more habits.
- **Camilla:** made sequence diagram for SDD, find a problem in the program and fixed it(moved a list from VM to model), Started on notifications
- **Alexander:** Fixed so User have a profile picture that can be changed and is stored. Fixed edit profile and edit password. Created a help page, currently empty but can be filled in when necessary. Fixed so when you log out you can't press back to get into the app again.
- **Johannes:** Themes now finished, might need to be delegated/refactored to another class/package. Wrote on interfaces in the SDD and added some relevant pictures. Worked on Travis, wasn't as fun as thought. Creates extreme headache.

### ## Discussion items (35 min)

- Put theme changer in VM package and delegate.
- Saving not working between runs of app. Add permission in manifest? Use debugger, see what does not work.
- **Discuss the identified issues, and possibly new or more general issues (very short notes and/or keywords).**

## **## Outcomes and assignments (5 min)**

- **Jian** - Create Habit interface, work on Habit detail view so that the right information is showed, make it possible to click on edit button and implement delete button.
- **Li**: Fix lists in menu for group, habits and friends. Comment code. Continue on SDD.
- **Alexander**: Look at accessability, comment code, create test, look at the saving functionallity.
- **Camilla**: Make sequence diagram, implement the user story notifications. Make a interface for NumOfHabitsAchievement & StreakAchievement
- **Johannes**: Add Achievement page with functionality. Continue to write on SDD Interface and eventually more sections.
- **Nils-Martin**: Groups backend, HubbaModel interface and eventually more interfaces.
- **Outcomes from discussion items. Write down what's decided and why it was decided. Sync with other documentation (add terms to wordbook).**
- **(re)Assign to each group member which issues to solve.**

## **## Wrap up**

**Next meeting:** Monday 22/10-18.

- **Write down any unresolved issues for next meeting.**
- **Decide a time and location for next meeting.**
