Meeting Agenda

Group: Hubba
Date: 20/9-18
Chair: Same as last time, but we found out it's the brand Martela.
Participants: Li, Jian, Alexander, Johannes, Camilla, Nils-Martin.

Objectives (5 min)

- Work with git desktop. Having problems with bash.
- How to sync users with other users.
- Should achievements be coupled with user or habits?
- Emulator not working due to hardware acceleration.

Reports (15 min) from previous meeting

- Li: read git workflow, and tested to use it. However don't understand the branch part. Created two classes: user and habit without contents. Domain Model created and created a few user stories together with Camilla.
- Alexander: Worked with user stories, tasks and acceptance criteria. Did not work with domain model. Gotten all programs to work on computer.
- Camilla: read git workflow, and tested to use it. However don't understand the branch part. Domain Model created and created a few user stories together with Li. Gotten all programs to work on computer. Created hello world, with Jian and Nils-Martin
- Johannes: Worked with improving the domain model.
- Jian: Got the emulator to work and created hello world, with Nils-Martin and Camilla. Added + button. Checked to see if access to git.
- Nils-Martin: Created hello world, with Jian and Camilla. Wrote presentation for seminar. Emulator not working due to hardware acceleration.

Discussion items (35 min)

- Emulate on Nexus 5x with API 28.
- Work on github desktop so that we use the same thing.
- Why branches? Less merge conflicts.
- Should achievements belong with users or habits?
        - Both, achievements can be either related to user or specific to the habits.
- How to sync users with other users. Research options and see what solutions are viable for the project.
- Hardware accelaration: check bios.

Outcomes and assignments (5 min)

- Nils-Martin: Get emulator to work.
- Johannes: Update domain model.
- Li: Check what user class could need.
- Camilla: Make habitbutton to work.
- Jian: Check what habit class could need.
- Alexander: Task for login, 2h.

Wrap up
Måndag 24/9-18 09:00 M1206B
